AEROSPACE SYSTEMS

Laboratory study of the bi-leader process from an electrically floating conductor. I. General results p185

AUTOMATIC TEST SYSTEMS

Electromagnetic inductance tomography (EMT): sensor, electronics and image reconstruction algorithm for a system with a rotatable parallel excitation field p20
Use of parametric modelling and statistical pattern recognition in detection of awareness during general anaesthesia p307

BIOLOGICAL AND BIOMEDICAL SYSTEMS

Analysis of the second heart sound for diagnosis of paediatric heart disease p285
Comparison of methods for harmonic wavelet analysis of heart rate variability p291
Comparison of techniques for time-frequency analysis of the ECG during human ventricular fibrillation p301
Deconvolution problem to produce ultrasonic short pulses p317
Generation of a prespecified electromagnetic field on the axis of a two-layer lossy cylinder p222
Human ECG: nonlinear deterministic versus stochastic aspects p279
Identification of inter-ictal spikes in the EEG using neural network analysis p270
Pseudo-inverse filtering of IVUS images p321
Reduction of magnetic fields from electric power and installation lines p215
Three-dimensional reconstruction algorithm for electrical resistance tomography p85
Use of parametric modelling and statistical pattern recognition in detection of awareness during general anaesthesia p307

CABLES AND OVERHEAD LINES

Reduction of magnetic fields from electric power and installation lines p215
Test procedures and lifetime data analysis for electro-thermal endurance characterisation of EPR-insulated cables p13

CALIBRATION

High sensitivity precision relative intensity noise calibration standard using low noise reference laser source p163
Low permeability reference standards with improved high magnetic field strength performance p181
Measurements of the temperature dependence of the output voltages of some Zener diode based voltage standards p154

CIRCUIT CAD

Modelling of a high-frequency operated fluorescent lamp in an electronic ballast environment p111

CIRCUIT THEORY AND DESIGN

Analysis of error propagation in computing the Maxwell matrix of multiconductor structure from measurements p117
Finite-element computation of capacitance networks in multiple-electrode systems: application to ZnO surge arresters p129
Modelling of a high-frequency operated fluorescent lamp in an electronic ballast environment p111
Optimisation of empirical model for IC fabrication process using linear programming p58
Steady-state and transient models for the electrical response of an electrorheological catch system p94

CODES AND DECODING

Golay sequences for identification of linear systems with weak nonlinear distortion p123

COMPUTATIONAL COMPLEXITY

Three-dimensional reconstruction algorithm for electrical resistance tomography p85
Use of transmission-line modelling method in FEM for solution of nonlinear eddy-current problems p31

COMPUTER APPLICATIONS

Analysis of error propagation in computing the Maxwell matrix of multiconductor structure from measurements p117
Comparison of analytic, numerical and approximate models for shielding effectiveness with measurement p61
Electromagnetic inductance tomography (EMT): sensor, electronics and image reconstruction algorithm for a system with a rotatable parallel excitation field p20
Finite-element computation of capacitance networks in multiple-electrode systems: application to ZnO surge arresters p129
Modelling of a high-frequency operated fluorescent lamp in an electronic ballast environment p111
New technique to enhance the accuracy of 2-D/3-D field quantities and forces obtained by standard finite-element solutions p67
Optimisation of empirical model for IC fabrication process using linear programming p58
Three-dimensional reconstruction algorithm for electrical resistance tomography p85
Use of parametric modelling and statistical pattern recognition in detection of awareness during general anaesthesia p307
Use of transmission-line modelling method in FEM for solution of nonlinear eddy-current problems p31

CONVERTORS

Chaos in ferroresonant wound voltage transformers: effect of core losses and universal circuit behaviour p39
Modelling of a high-frequency operated fluorescent lamp in an electronic ballast environment p111

DIELECTRIC MATERIALS AND DEVICES

Acoustic fields from PVDF interdigital transducers p250
Comparison of DSC and TSDC investigations: α relaxation in polymers p53
Effects of negative direct voltage pre-stressing on the breakdown of conductor-rod gaps under positive impulse voltages p105
Fibre waveguide transducers for Lamb wave NDE p260
Single camera three-dimensional endoscope system using a ferroelectric liquid crystal device p49

EARTH SCIENCES

Generation of a prespecified electromagnetic field on the axis of a two-layer lossy cylinder p222

EDDY CURRENTS

Use of transmission-line modelling method in FEM for solution of nonlinear eddy-current problems p31

ELECTRIC DISCHARGES

Impulse breakdown of short rod-plane gaps and the influence of humidity p141
Influence of irradiation on impulse breakdown of sphere gaps and sphere-rod gaps p147
Laboratory study of the bi-leader process from an electrically floating conductor. II. Bi-leader properties p193

ELECTRO-OPTICAL DEVICES

Single camera three-dimensional endoscope system using a ferroelectric liquid crystal device p49

ELECTROMAGNETIC COMPATIBILITY

Analysis and realisation of low-cost damped screened rooms p1
Comparison of analytic, numerical and approximate models for shielding effectiveness with measurement p61

ELECTROMAGNETIC THEORY

Analysis and realisation of low-cost damped screened rooms p1
Comparison of analytic, numerical and approximate models for shielding effectiveness with measurement p61

ELECTROMAGNETISM

Generation of a prespecified electromagnetic field on the axis of a two-layer lossy cylinder p222
New technique to enhance the accuracy of 2-D/3-D field quantities and forces obtained by standard finite-element solutions p67
Use of transmission-line modelling method in FEM for solution of nonlinear eddy-current problems p31

FIBRE OPTICS

Fibre waveguide transducers for Lamb wave NDE p260

FILTERS AND FILTERING

Pseudo-inverse filtering of IVUS images p321

INFORMATION THEORY

Golay sequences for identification of linear systems with weak nonlinear distortion p123

INSTRUMENTATION AND MEASUREMENT

Electromagnetic inductance tomography (EMT): sensor, electronics and image reconstruction algorithm for a system with a rotatable parallel excitation field p20
Single camera three-dimensional endoscope system using a ferroelectric liquid crystal device p49

INSULATORS AND INSULATION

Portable optoelectronic instrument for measuring furfuraldehyde in transformer oil p45
Short-time Fourier and wavelet transforms for fault detection in power transformers during impulse tests p77
Test procedures and lifetime data analysis for electro-thermal endurance characterisation of EPR-insulated cables p13

INTEGRATED CIRCUITS

Influence of lot arrival distribution on production dispatching rule scheduling and cost in the final test process of LSI manufacturing system p26
Measurements on millimetre wave circuits at 140 GHz p171
Optimisation of empirical model for IC fabrication process using linear programming p58

INTERFERENCE SUPPRESSION

Analysis and realisation of low-cost damped screened rooms p1
Comparison of analytic, numerical and approximate models for shielding effectiveness with measurement p61

LASERS

High sensitivity precision relative intensity noise calibration standard using low noise reference laser source p163
Laser generation of ultrasonic Lamb waves using low power optical sources p244

LINEAR NETWORK ANALYSIS

Analysis of error propagation in computing the Maxwell matrix of multiconductor structure from measurements p117
Generalised TLM switch model for power electronics applications p101
Use of transmission-line modelling method in FEM for solution of nonlinear eddy-current problems p31

MAGNETIC MATERIALS AND DEVICES

Low permeability reference standards with improved high magnetic field strength performance p181

MATERIALS AND MATERIALS TESTING

Acoustic fields from PVDF interdigital transducers p250
Air-coupled ultrasonic transducers for measurement of green-state ceramics at elevated temperatures p237
Broadband dielectric spectroscopy of conducting polyaniline p166
Comparison of DSC and TSDC investigations: α relaxation in polymers p53
Fibre waveguide transducers for Lamb wave NDE p260
Generation of a prespecified electromagnetic field on the axis of a two-layer lossy cylinder p222
Laser generation of ultrasonic Lamb waves using low power optical sources p244
Steady-state and transient models for the electrical response of an electrorheological catch system p94
Ultrasonic transducers for high temperature applications p229

MATHEMATICAL TECHNIQUES

Analysis of the second heart sound for diagnosis of paediatric heart disease p285
Comparison of methods for harmonic wavelet analysis of heart rate variability p291
Comparison of techniques for time-frequency analysis of the ECG during human ventricular fibrillation p301
Human ECG: nonlinear deterministic versus stochastic aspects p279
New technique to enhance the accuracy of 2-D/3-D field quantities and forces obtained by standard finite-element solutions p67
Optimisation of empirical model for IC fabrication process using linear programming p58
Quantitative assessment of experimental repeatability p177
Three-dimensional reconstruction algorithm for electrical resistance tomography p85
Use of parametric modelling and statistical pattern recognition in detection of awareness during general anaesthesia p307

MEASUREMENT OF SPECIFIC VARIABLES

3.5 mm coaxial power standard p159
Acoustic fields from PVDF interdigital transducers p250
Electromagnetic inductance tomography (EMT): sensor, electronics and image reconstruction algorithm for a system with a rotatable parallel excitation field p20
High sensitivity precision relative intensity noise calibration standard using low noise reference laser source p163
Low permeability reference standards with improved high magnetic field strength performance p181
Measurements of the temperature dependence of the output voltages of some Zener diode based voltage standards p154
Measurements on an ensemble of spheres in the transonic velocity regime p8
Portable optoelectronic instrument for measuring furfuraldehyde in transformer oil p45
Three-dimensional reconstruction algorithm for electrical resistance tomography p85

MEASUREMENT SCIENCE

3.5 mm coaxial power standard p159
High sensitivity precision relative intensity noise calibration standard using low noise reference laser source p163
Low permeability reference standards with improved high magnetic field strength performance p181
Measurements of the temperature dependence of the output voltages of some Zener diode based voltage standards p154
Quantitative assessment of experimental repeatability p177

MICROWAVE CIRCUITS

Measurements on millimetre wave circuits at 140 GHz p171

MICROWAVE MEASUREMENT TECHNIQUES

3.5 mm coaxial power standard p159
Measurements on millimetre wave circuits at 140 GHz p171

NETWORK ANALYSIS

Generalised TLM switch model for power electronics applications p101

NEURAL NETS

Identification of inter-ictal spikes in the EEG using neural network analysis p270
Use of parametric modelling and statistical pattern recognition in detection of awareness during general anaesthesia p307

NONLINEAR NETWORK ANALYSIS

Chaos in ferroresonant wound voltage transformers: effect of core losses and universal circuit behaviour p39

NUMERICAL ANALYSIS

Analysis and realisation of low-cost damped screened rooms p1
Analysis of error propagation in computing the Maxwell matrix of multiconductor structure from measurements p117
Circulating-current loss in transformer windings p136
Comparison of analytic, numerical and approximate models for shielding effectiveness with measurement p61
Comparison of methods for harmonic wavelet analysis of heart rate variability p291
Finite-element computation of capacitance networks in multiple-electrode systems: application to ZnO surge arresters p129
New technique to enhance the accuracy of 2-D/3-D field quantities and forces obtained by standard finite-element solutions p67
Short-time Fourier and wavelet transforms for fault detection in power transformers during impulse tests p77
Three-dimensional reconstruction algorithm for electrical resistance tomography p85
Use of transmission-line modelling method in FEM for solution of nonlinear eddy-current problems p31

OPTICAL IMAGE PROCESSING

Deconvolution problem to produce ultrasonic short pulses p317
Electromagnetic inductance tomography (EMT): sensor, electronics and image reconstruction algorithm for a system with a rotatable parallel excitation field p20
Three-dimensional reconstruction algorithm for electrical resistance tomography p85

OPTICAL MATERIALS AND DEVICES

High sensitivity precision relative intensity noise calibration standard using low noise reference laser source p163
Single camera three-dimensional endoscope system using a ferroelectric liquid crystal device p49

OPTIMISATION

New technique to enhance the accuracy of 2-D/3-D field quantities and forces obtained by standard finite-element solutions p67

POWER ELECTRONICS

Chaos in ferroresonant wound voltage transformers: effect of core losses and universal circuit behaviour p39
Generalised TLM switch model for power electronics applications p101
Modelling of a high-frequency operated fluorescent lamp in an electronic ballast environment p111

POWER ENGINEERING COMPUTING

Finite-element computation of capacitance networks in multiple-electrode systems: application to ZnO surge arresters p129
Short-time Fourier and wavelet transforms for fault detection in power transformers during impulse tests p77

POWER SYSTEM PROTECTION

Effects of negative direct voltage pre-stressing on the breakdown of conductor-rod gaps under positive impulse voltages p105
Finite-element computation of capacitance networks in multiple-electrode systems: application to ZnO surge arresters p129
Impulse breakdown of short rod-plane gaps and the influence of humidity p141
Influence of irradiation on impulse breakdown of sphere gaps and sphere-rod gaps p147
Laboratory study of the bi-leader process from an electrically floating conductor. I. General results p185
Sparkover in the rod-plane gap under combined direct and impulse voltages p207
Tests of the 'early streamer emission' principle for protection against lightning p200

POWER SYSTEMS AND APPLICATIONS

Modelling of a high-frequency operated fluorescent lamp in an electronic ballast environment p111

POWER SYSTEMS AND PLANTS

Modelling of a high-frequency operated fluorescent lamp in an electronic ballast environment p111
New technique to enhance the accuracy of 2-D/3-D field quantities and forces obtained by standard finite-element solutions p67

POWER TRANSMISSION AND DISTRIBUTION

Analysis of error propagation in computing the Maxwell matrix of multiconductor structure from measurements p117

PROBABILITY AND STATISTICS

Analysis of the second heart sound for diagnosis of paediatric heart disease p285
Comparison of techniques for time-frequency analysis of the ECG during human ventricular fibrillation p301
Effects of negative direct voltage pre-stressing on the breakdown of conductor-rod gaps under positive impulse voltages p105
Human ECG: nonlinear deterministic versus stochastic aspects p279
Quantitative assessment of experimental repeatability p177
Use of parametric modelling and statistical pattern recognition in detection of awareness during general anaesthesia p307

PRODUCTION ENGINEERING

Influence of lot arrival distribution on production dispatching rule scheduling and cost in the final test process of LSI manufacturing system p26
Three-dimensional reconstruction algorithm for electrical resistance tomography p85

PROGRAMMING THEORY

Use of transmission-line modelling method in FEM for solution of nonlinear eddy-current problems p31

SEMICONDUCTOR DEVICES AND MATERIALS

Measurements of the temperature dependence of the output voltages of some Zener diode based voltage standards p154
Optimisation of empirical model for IC fabrication process using linear programming p58

SEMICONDUCTOR LASERS

High sensitivity precision relative intensity noise calibration standard using low noise reference laser source p163

SIGNAL PROCESSING

Analysis of the second heart sound for diagnosis of paediatric heart disease p285
Comparison of methods for harmonic wavelet analysis of heart rate variability p291
Comparison of techniques for time-frequency analysis of the ECG during human ventricular fibrillation p301
Deconvolution problem to produce ultrasonic short pulses p317
Golay sequences for identification of linear systems with weak nonlinear distortion p123
Human ECG: nonlinear deterministic versus stochastic aspects p279
Identification of inter-ictal spikes in the EEG using neural network analysis p270
Use of parametric modelling and statistical pattern recognition in detection of awareness during general anaesthesia p307

SIMULATION, MODELLING AND IDENTIFICATION

Golay sequences for identification of linear systems with weak nonlinear distortion p123

SONICS AND ULTRASONICS

Acoustic fields from PVDF interdigital transducers p250
Air-coupled ultrasonic transducers for measurement of green-state ceramics at elevated temperatures p237
Deconvolution problem to produce ultrasonic short pulses p317
Fibre waveguide transducers for Lamb wave NDE p260
Laser generation of ultrasonic Lamb waves using low power optical sources p244
Pseudo-inverse filtering of IVUS images p321
Ultrasonic transducers for high temperature applications p229

SYSTEMS THEORY

Identification of inter-ictal spikes in the EEG using neural network analysis p270
Influence of lot arrival distribution on production dispatching rule scheduling and cost in the final test process of LSI manufacturing system p26

TRANSFORMERS

Chaos in ferroresonant wound voltage transformers: effect of core losses and universal circuit behaviour p39
Circulating-current loss in transformer windings p136
Portable optoelectronic instrument for measuring furfuraldehyde in transformer oil p45
Short-time Fourier and wavelet transforms for fault detection in power transformers during impulse tests p77

TRANSMISSION LINE THEORY

Comparison of analytic, numerical and approximate models for shielding effectiveness with measurement p61
Generalised TLM switch model for power electronics applications p101
Use of transmission-line modelling method in FEM for solution of nonlinear eddy-current problems p31

WAVEGUIDES

Measurements on millimetre wave circuits at 140 GHz p171
